Timothy Goodwin : Within These Woods: A Collection of Northwoods Nature essays with Original illustrations by the Author before purchasing it in order to gauge whether or not it would be worth my time, and all praised Within These Woods: A Collection of Northwoods Nature essays with Original illustrations by the Author:

1 of 1 people found the following review helpful. A Contemporary "Walden" By Tom Mattausch Dr. Goodwin's work is a joy to read. His drawings and text obviously are founded in scientific knowledge, yet he creates a magnetic meditative mood which makes the book difficult to set aside. 1 of 1 people found the following review helpful. Five Stars By Customer worth owning, rewarding reading 0 of 0 people found the following review helpful. I thoroughly enjoyed the book By Peter H. Full disclosure: Tim Goodwin is married to my niece. I am not a confirmed buyer because Tim was kind enough to sign a book for me. I also live in southern Michigan so many of the vignettes are familiar to me. That said, I thoroughly enjoyed the book. I like to read in bed for a few minutes before going to sleep, and this is perfect for that. Short chapters with nice pen ink drawings on the relevant topics. And fascinating information. I always struggled to tell the difference between firs and spruces. Firs have flat needles, spruces have square needles; the latter will roll between your fingers, the former will not. The first creature discussed is the deer mouse, tiny creature scurrying amongst the grasses. Considered a pest by humans, dinner by owls, foxes, and other predators. The last chapter speaks to the night sky, the constellations, and the Milky Way. From first to last is the consistent gentle reminder of our place in this universe and the interconnectivity of it all, from the ground beneath our feet to the vast expanse of the universe. I recommend this book for everyone's nightstand.

The Northwoods has a new voice to discuss the connection between mankind and our natural world. With the eye of a biologist and the soul of an artist, Tim Goodwin guides the reader on a personal and educational journey through the Northwoods of the Great Lakes Region. He reflects on the elegance of the evolutionary process and the interconnectedness of all living things. At times a microscopic examination of the forest floor, and at others a far-reaching gaze into the wonders of a night sky. Goodwin explores this enchanted place and the delicate dance its history, geology, and organisms have performed since before recorded time. Along the way, he asks the hard questions about stewardship and spirituality that only connecting to nature and understanding our place in it can begin to answer

"In Within These Woods Dr. Tim Goodwin has woven together a tapestry sure to delight those who seek a deeper understanding of the North Country. The science is sound, the writing evocative, and the illustrations add a touch

of personal artistry. But it is the love of place, a love that many will share and find so beautifully expressed, that ties everything together and makes this volume a treasure for any cabin book shelf. It will have a place on mine." - Douglas Wood, author of *Old Turtle*, and *Paddle Whispers* "Within These Woods" delivers an intimate and knowledgeable perspective on the flora and fauna of the Minnesota forest. It transports us from the page and into the wild. That transforms our worldview. When you really get to know something it is impossible to be ambivalent about its destruction." --Anton Treuer, author of *Everything You Wanted to Know About Indians But Were Afraid to Ask* "The book is a thematic collection of Goodwin's poems, essays and artwork meant to provide Goodwin's answer to the broad question of how he, as a human being and a member of a globally interconnected ecosystem, ought to live in the world. On his path to that answer, he reflects on the elegance of evolution and the interconnectedness of all living things." - Andy Bartlett, Bemidji State University From the Author For updates and product information, visit us at: riverfeetpress.com From the Back Cover "....we do not own these woods. They own us."
